Review a Proposal – FAP Reviewer

Science and Technology Facilities Council

ISIS Neutron and Muon Source

Pre-requisites:

- Reviewer has been assigned to a proposal by the FAP Secretary

Process:

1. Log into Proposals
2. Select FAP Reviewer role, (if required)
3. Chooses the proposal(s) that needs reviewing
4. Add your comments
5. Add your Grade, (check the Grading Guide for assistance with grading the review)
6. Save your review

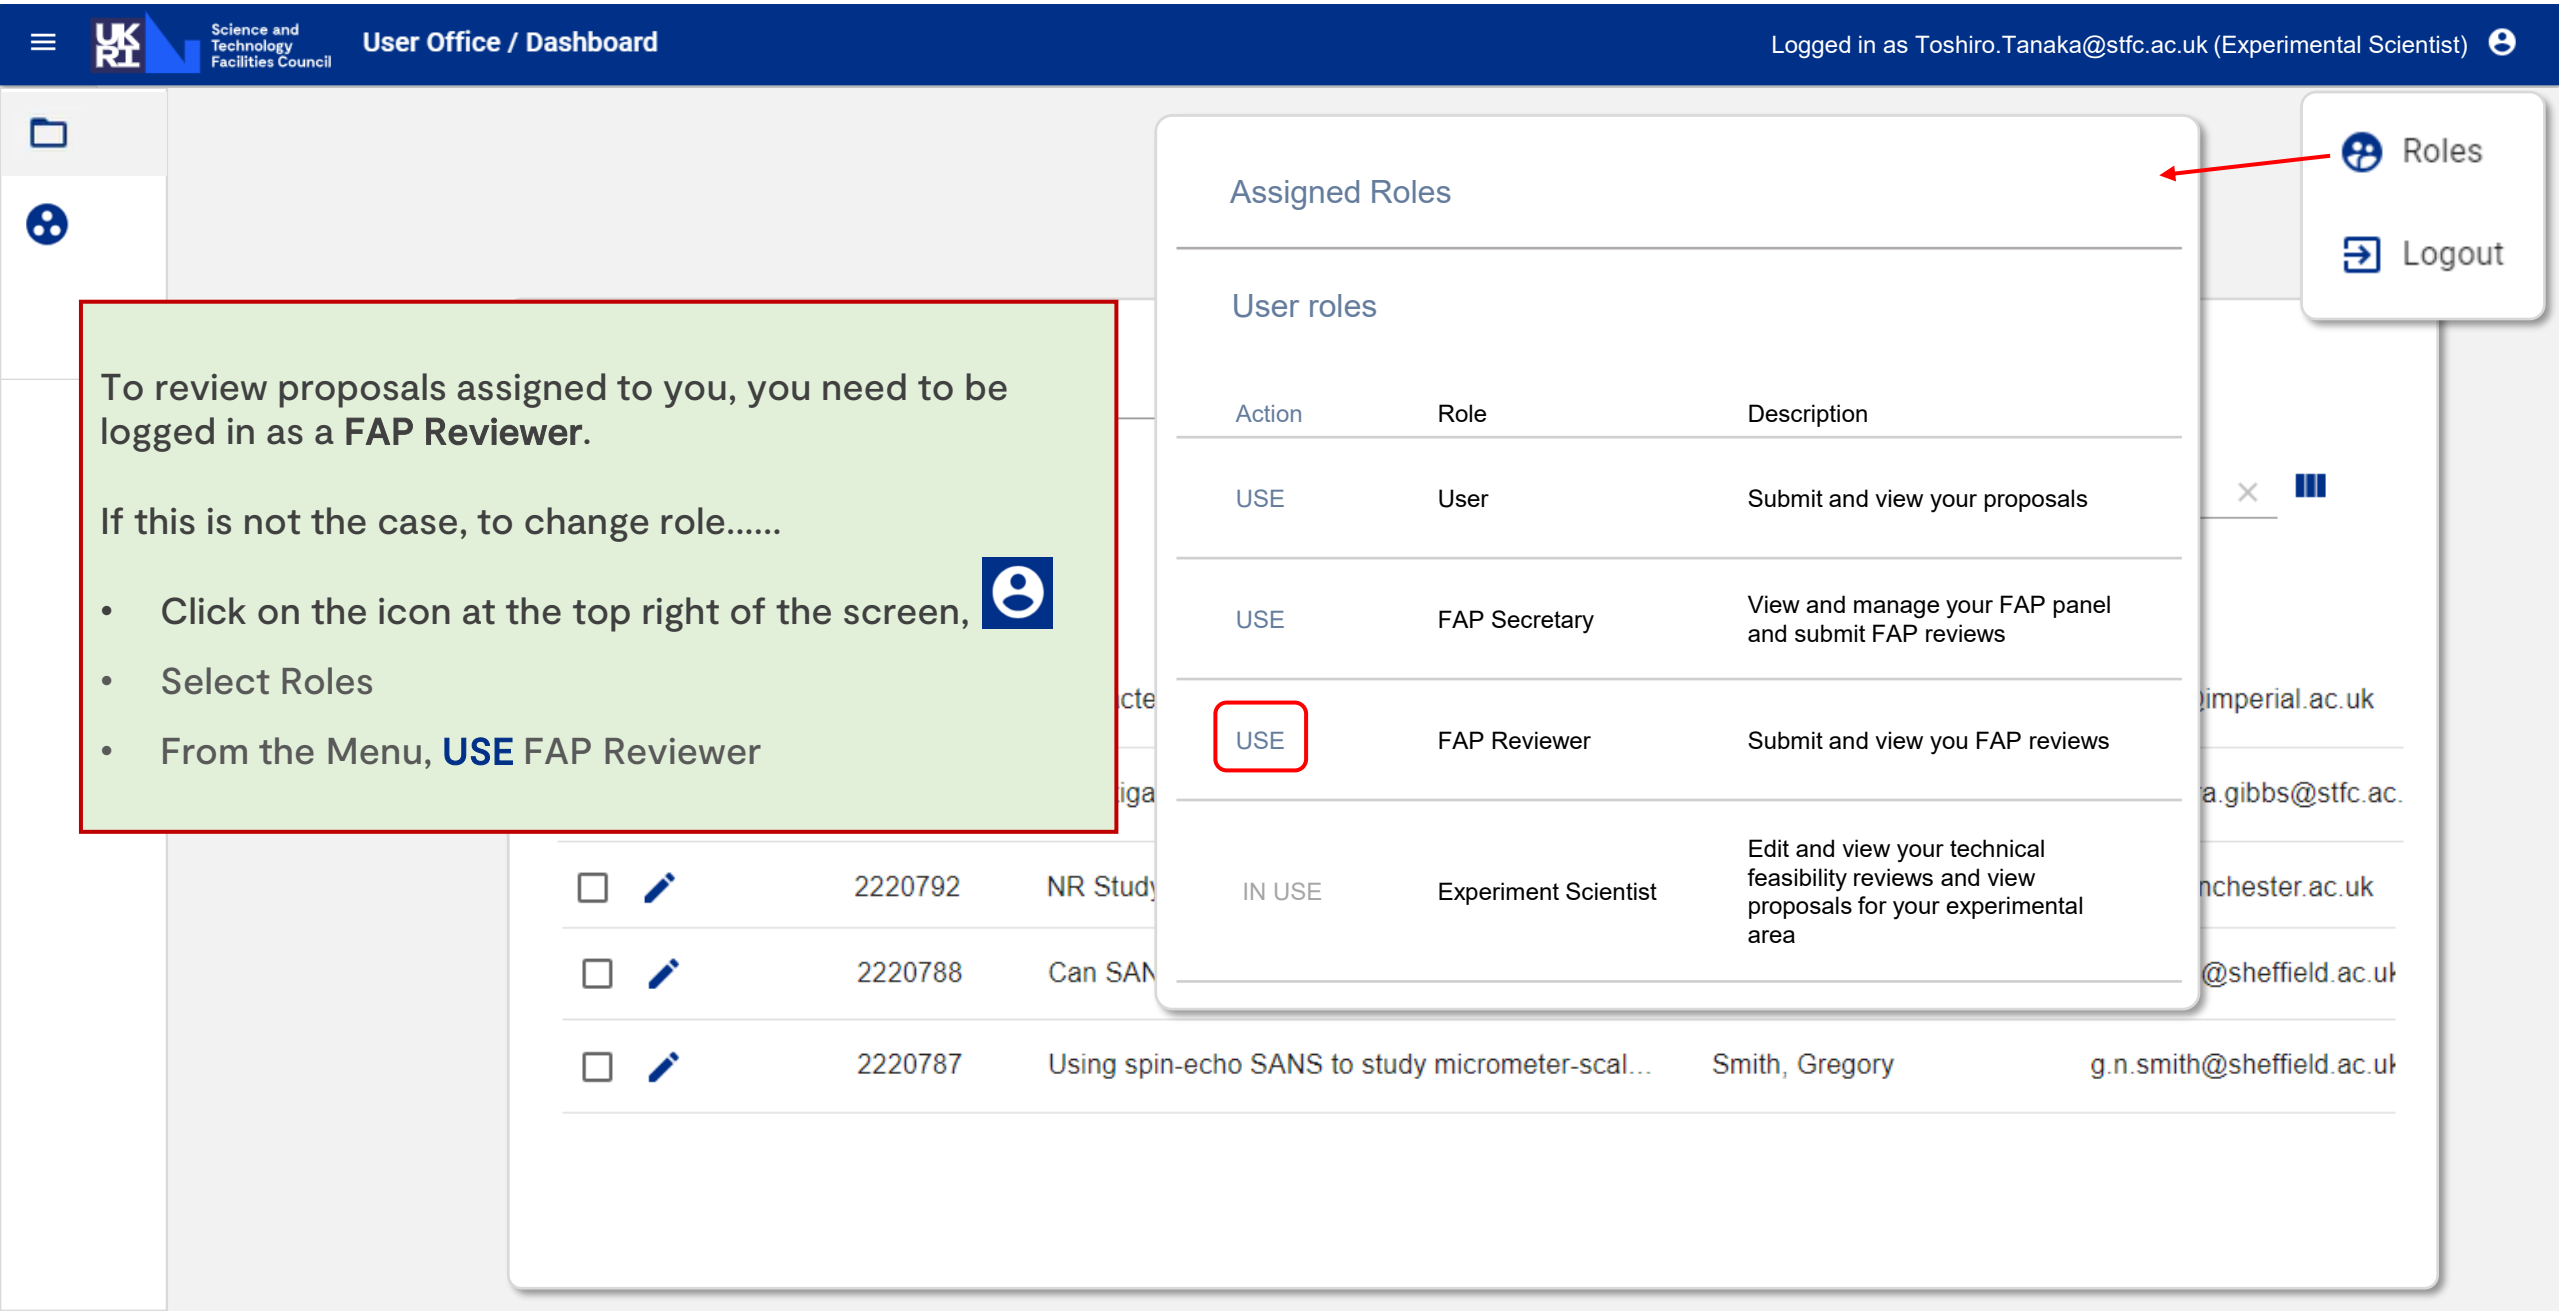
Select FAP Reviews

Select FAP Reviewer role, (if required)



To review proposals assigned to you, you need to be logged in as a **FAP Reviewer**.

If this is not the case, to change role.....

- Click on the icon at the top right of the screen,
- Select Roles
- From the Menu, **USE** FAP Reviewer

Welcome to the STFC online Facility Access Panel (FAP) proposal review system

This page is for FAP reviewers and Chairs to scientifically review any assigned proposals.

If you are trying to submit a proposal, please change your role from "FAP Reviewer" / "FAP Chair" to "User" by clicking the head icon in the top right-hand corner of this page.

For guidance on how to review proposals please see the "Documents" section in the FAP information area.

If you wish to go back and edit your scores and reviews please only click "Save". Click "Submit" once you are ready to lock-in your scores and comments. If you have "Submitted" and wish to retrospectively edit please contact fase-support@stfc.ac.uk

If you have any queries on your assigned proposals, please contact your FAP Secretary.

If you have any technical issues using the online system, please email fase-support@stfc.ac.uk

This system will automatically log out after 30 minutes of inactivity, and any unsaved changes will be lost.

For persistent system issues, please contact fase-support@stfc.ac.uk

On the **FAPs** page, you will be able to see all Facility Access Panels you belong to.

PROPOSAL INFORMATION | TECHNICAL REVIEW | GRADE

New proposal

Proposal ID	11376
Title	Goldene as a catalyst, and creating monolayers using other catalytic metals
Abstract	Investigation looking at gold photocatalysts to split water to produce hydrogen., considering the problems of residual traces of iron from Murukami's reagent with the potential to hamper the development of goldene as a catalyst. Exploring a variety of methods which could be used to make monolayers of other catalytic metals, including iridium, platinum and palladium.
Principal Investigator	kelvin.treeves@stfc.ac.uk
Co-Proposers	Tray Swift (swit@physics.utexas.edu), Petra Gnu (petra.gnu@strath.ac.uk)

Pick instrument

Which instrument?	SANS2D

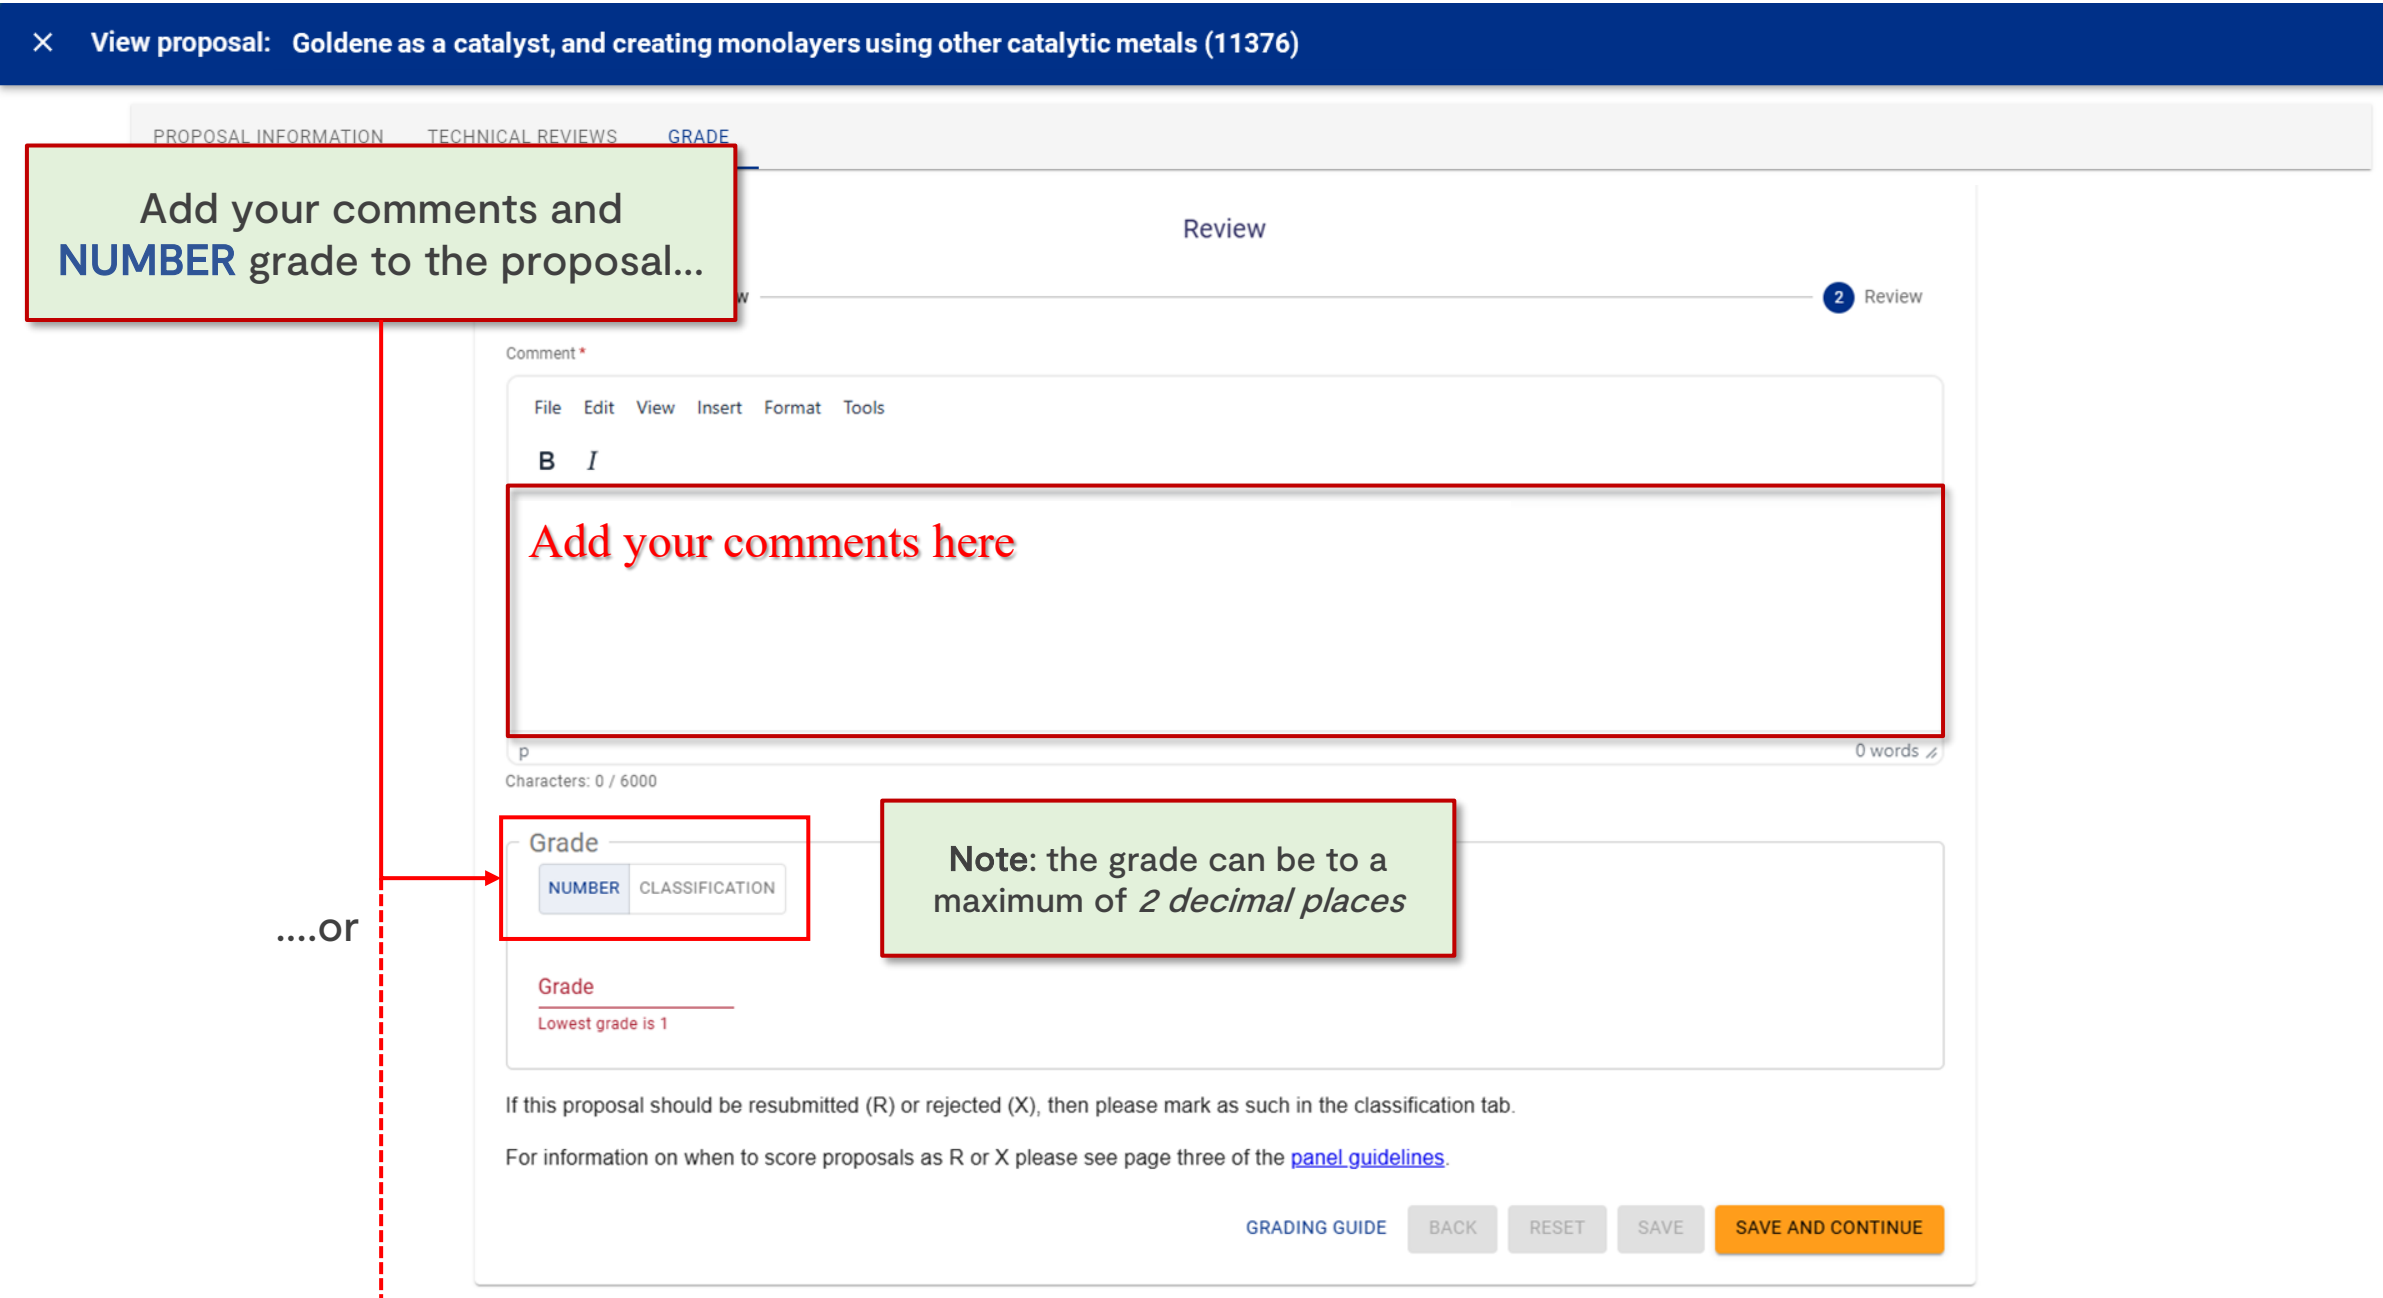
TECHNICAL REVIEW, provides an overview of the technical review

Reviewing a Proposal – GRADE is where you add your contribution to the review

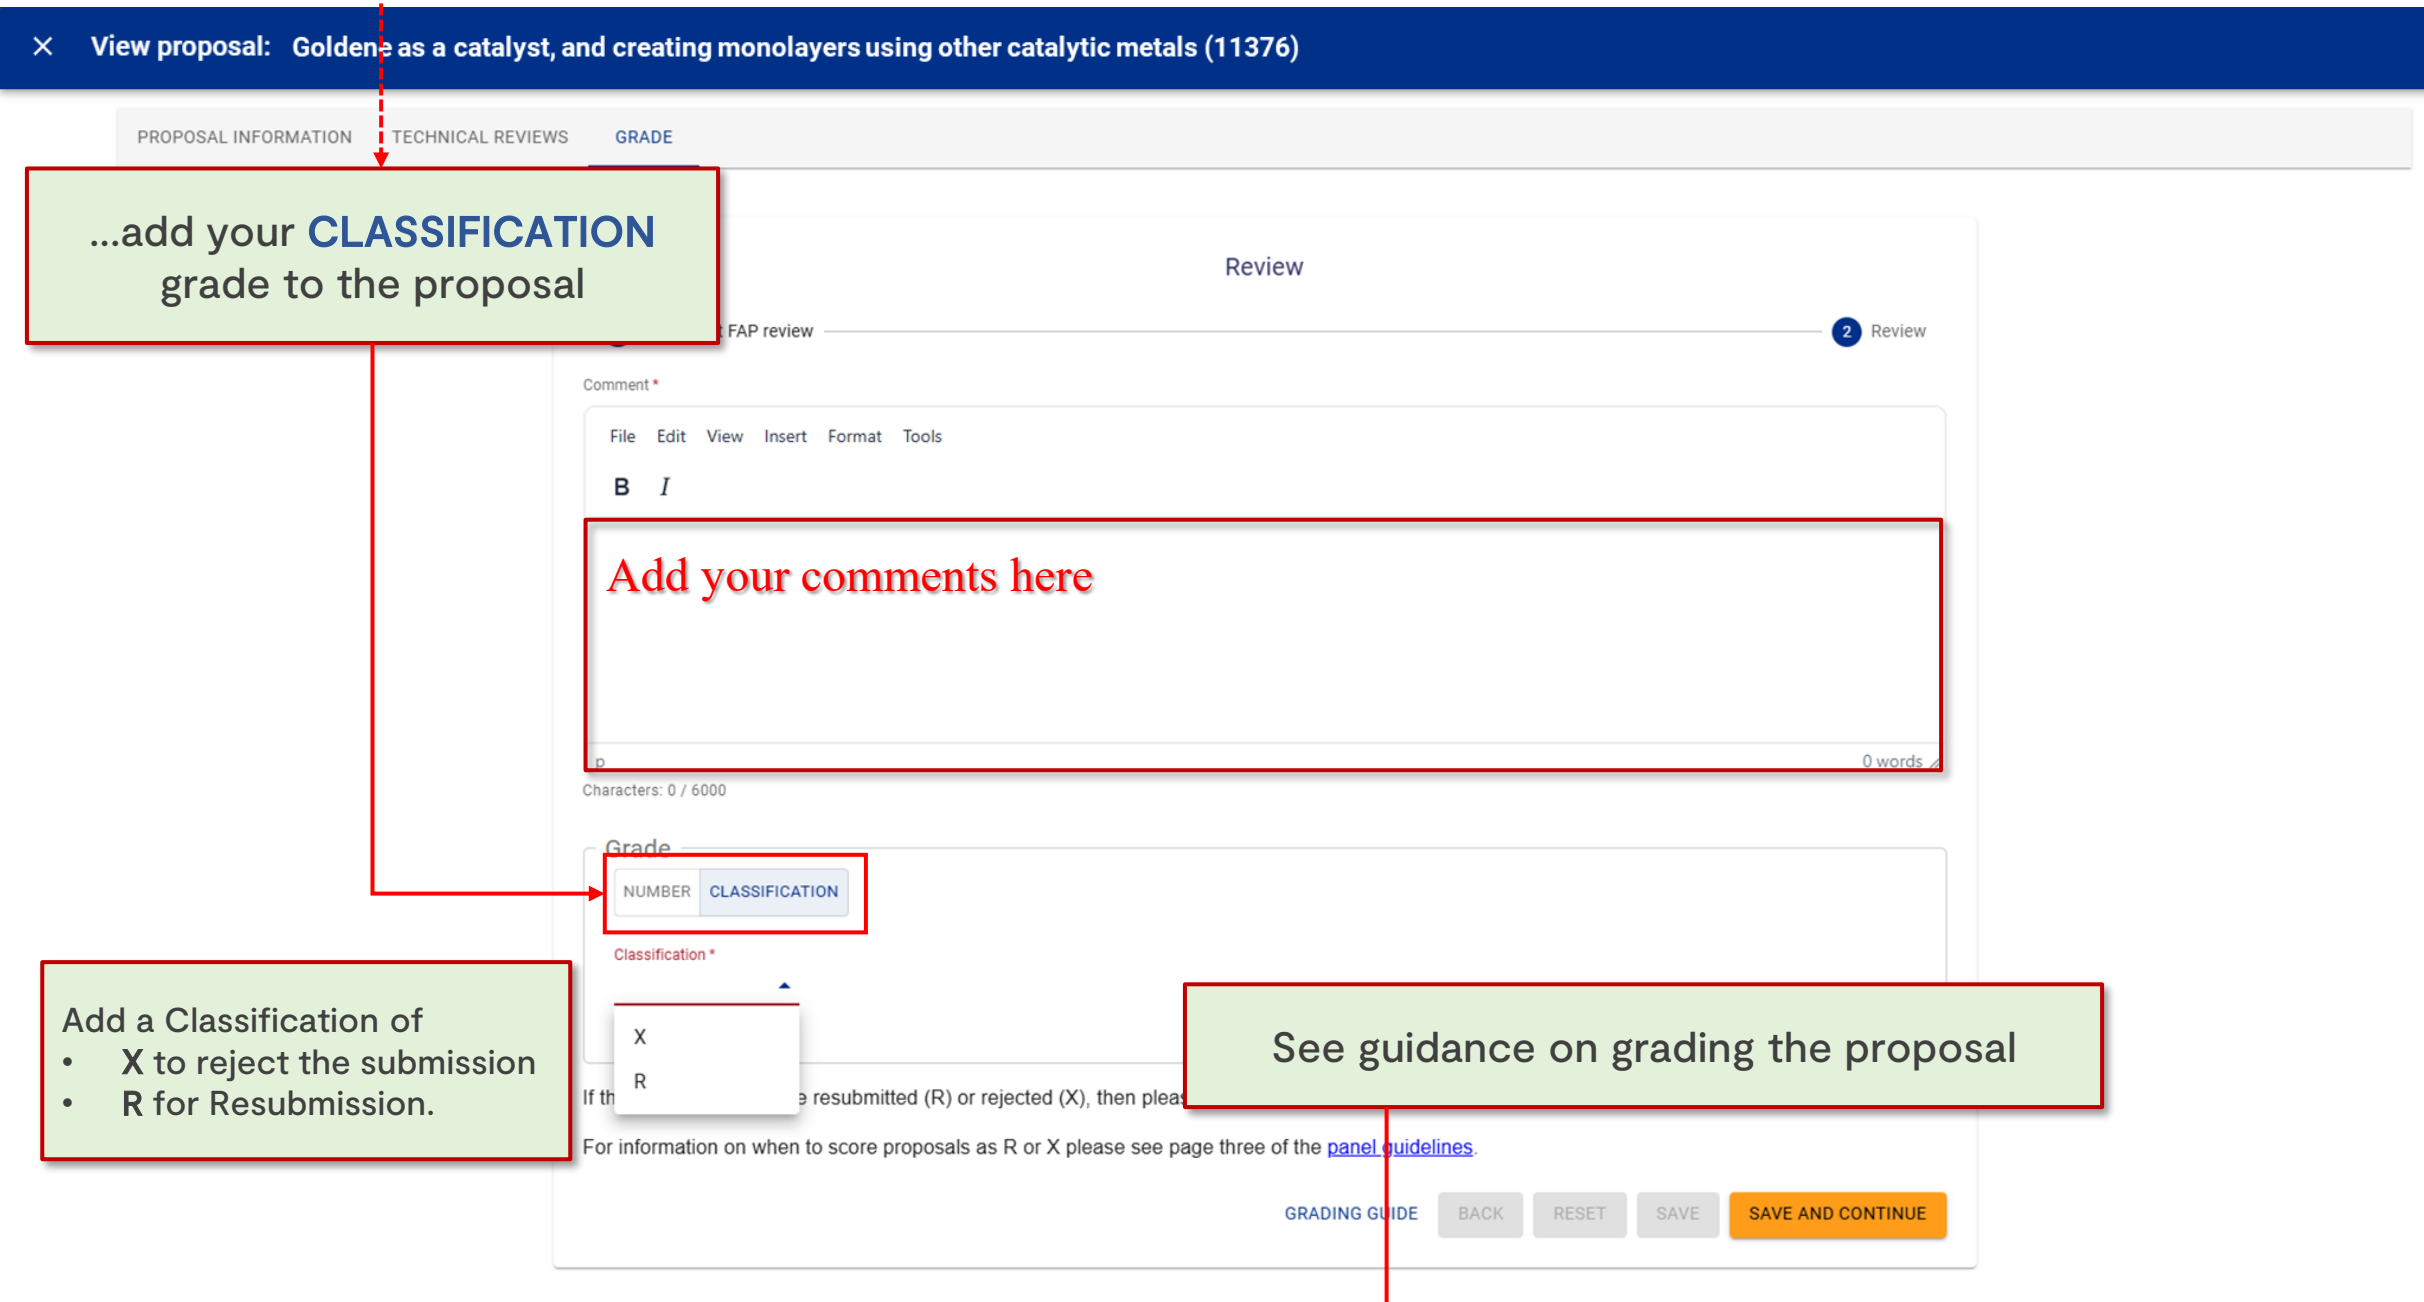


Add your comments and **NUMBER** grade to the proposal...

....or

Note: the grade can be to a maximum of *2 decimal places*

Reviewing a Proposal – GRADE is where you add your contribution to the review



...add your **CLASSIFICATION** grade to the proposal

Add a Classification of
- **X** to reject the submission
- **R** for Resubmission.

See guidance on grading the proposal

Grading Guide

Proposal grading and prioritisation

The ISIS FAPs will peer review all submitted proposals and agree an overall grade for each proposal. The grades and an indication of the associated definitions and expected outcomes are given in the table below.

Proposals which are scientifically or technically flawed should be rejected and marked X. Proposals which would have been ranked 1 to 10, except for an identified and correctable element, should be marked R for resubmission; panels may wish to recommend use of the ISIS Rapid or Xpress access routes in such cases.

Grade	Expected Review Outcome	Definition for Guidance
10	Beam time allocation is essential	Outstanding, world class
9		
8	Beam time allocation is recommended	Excellent
7		
6	Beam time allocation is possible	Good
5		
4	Beam time allocation should not be made	Fair
3		
2		Uncompetitive
1		Unsatisfactory

R	Panel would like to see a resubmission with panel comments addressed. Rapid or Xpress routes could be recommended	Resubmit
X	Panel do not want to see a resubmission	Reject

Reviewing a Proposal – GRADE is where you add your contribution to the review

This submission has potential but there are a number of areas where there are concerns.

Please go back to the PI and check with them on how you may be able to improve the accuracy of the readings you're likely to achieve.

Characters: 22 / 6000

Grade

1.46

If this proposal should be resubmitted (R) or rejected (X), then please score appropriately below. Please note:
for the proposal, which can be zero "0".

For information on when to score proposals as R or X please see page three of the panel guidelines.

R
